

FOR IMMEDIATE RELEASE:

Dynamic Realms Releases *dynamicDICE* on the iTunes App Store

Phoenix, AZ - January 5, 2009 - The release of *dynamicDICE* on the App Store

The definitive 3D dice rolling simulator for the iPhone and iPod Touch has arrived on the iTunes App Store! Useful for playing any game where dice are required but not available.

This is not just a calculator, or a random number generator. Instead, we aim to simulate the visceral experience of rolling the dice themselves. We focus on the dice, nothing else! *dynamicDICE* provides full range of view of the dice on a table from any angle just by rotating or tilting your iPhone. Shake the iPhone to make a roll, or just push the roll button.

With its inclusion of all standard dice rendered in beautiful detail along with a rich collection of 20+ different tables and dice sets, its real-time 3D physics, it's incredible full degree of motion visual scene effects, combined with a simple to use GUI, *dynamicDICE* aims to satisfy.

Dynamic Realms' mission is to provide our customers with quality software at a reasonable price. Dynamic Realms believes in providing intuitive interfaces combined with solid and well thought out applications while delivering an enjoyable experience for the user.
